Sylvan Source Adds Distribution in U.S. and Canada

New Agreements Extend M-600 Availability Across the U.S. and Expands Company's Reach into Central and Western Canada

SUNNYVALE, Calif., January 3, 2006 – Sylvan Source, the provider of breakthrough ultra-clean water systems, today announced agreements with two distributors of premier kitchen appliances in the Midwest, Northwest and in Canada to represent the Sylvan Source M-600 System, an automatic self-contained ultra-clean water system for the home that consistently reduces more contaminants more effectively than other available technologies without the need for expensive replacement components. Doolittle Distributing, Inc. will market the Sylvan Source M-600 in seven Midwestern states while Echelon Home Products will distribute the product in central and western Canada, as well as Alaska, Washington and Oregon. The new agreements are the latest to increase visibility to Sylvan Source's revolutionary technology and open access to the high-end consumer market.

“Our dealer network will gain a valuable addition to their product lines with the Sylvan Source M-600,” said Lloyd Doolittle of Doolittle Distributing, Inc. “Water purity has become an important issue to their customers and we are delighted to be able to provide a comprehensive solution in a single product.” Doolittle Distributing is a wholesale provider of premier kitchen appliances to building supply, kitchen, and appliance dealers in seven Midwestern States. In addition, the company maintains two state-of-the-art showrooms in Kansas City and St. Louis, and participates in many home shows throughout Nebraska, Iowa, Kansas, Missouri, Arkansas, and parts of Illinois.

“The trend toward high-performance, low-maintenance home systems makes the Sylvan Source M-600 an ideal addition to our product lines,” said Brendan Rigney, director of marketing for Echelon Home Products, Ltd. “The M-600’s innovative ultra-clean technology represents a welcome advance in water purification solutions and one that we believe will be enthusiastically adopted by our resellers.” Echelon Home Products serves appliance dealers, homebuilders, remodelers, and the design community in Western Canada and the Northwestern United States. Founded in 1983, the company counts nearly 300 dealers in its network.

The Sylvan Source M-600 integrates degassing, distillation, and demisting technologies into a unique multi-step cleaning process. Unlike conventional filtration, reverse osmosis, and distillation systems that require regular equipment cleaning, de-scaling, or filter changes – which most homeowners find costly and inconvenient – the Sylvan Source M-600 system requires no cleaning, uses no added chemicals, filters, cartridges, or membranes. This allows Sylvan Source to provide consistently clean water over time. One M-600 unit can be used for multiple points of water delivery where demand ranges from two to six gallons per day, such as faucets, refrigerator, and ice makers.

“Thanks to our robust distribution network, the Sylvan Source M-600 is now available across the United States and in a significant portion of Canada,” said Laura Demmons, chief executive officer of Sylvan Source. “The rapid adoption of our technology by premier distributors validates the timeliness of our leap forward in ultra-clean water technology.”

About Sylvan Source

Sylvan Source delivers technically advanced ultra-clean water systems designed for residential and industrial use. Sylvan Source products produce breakthrough water quality and eliminate the use of chemicals, filters, and membranes to assure consistent water quality and delicious taste over time. Founded in 2003, the company is

headquartered in Sunnyvale, California and is privately held. For more information, please visit www.sylvansource.com.
