FOR IMMEDIATE RELEASE

**Sylvan Source Ultra-Clean Water System Chosen for
2007 *Sunset* Idea House**

SUNNYVALE, Calif., January 4, 2007 – Sylvan Source, the provider of breakthrough ultra-clean water systems, announced that its M-600 ultra-clean water system has been selected as the exclusive water treatment system for *Sunset* magazine's 2007 Idea House in San Francisco. As a contributor to the project, Sylvan Source will be able to introduce its unique ultra-clean water technology to approximately 40,000 visitors. In addition to providing ultra-clean water for cooking and drinking, the M-600 system enhances the 2007 Idea House's theme of "Green Building."

Sylvan Source was chosen based on its commitment to ensuring ultra-clean drinking water and for its high-quality, maintenance-free water treatment solution. In 2006, the Sylvan Source M-600 was chosen for several builder showcase developments in the Midwest and South United States. The 3000-square foot Idea House will open in San Francisco's Mission District in late Summer, 2007, and will be one of the first remodeling projects in the nation to be certified by Leadership in Energy and Environmental Design (LEED), a globally recognized standard for measuring building sustainability.

"We are proud to be chosen for this prestigious project," said Laura Demmons, chief executive officer of Sylvan Source. "*Sunset*'s Idea House Program demonstrates its long commitment to bringing truly innovative, practical, and beautiful solutions to homeowners. Our values align with those of the Idea House Program, and as a Bay Area neighbor of *Sunset*, we are delighted to be chosen to participate in the 2007 project."

The maintenance-free Sylvan Source M-600 ultra-clean water system integrates degassing, distillation, and demisting technologies into a unique multi-step cleaning process that eliminates maintenance. It is currently the only home drinking water treatment appliance to achieve NSF/ANSI Standard 62 certification, and it is also the first ultra-clean water treatment system to be certified by the International Association of Plumbing and Mechanical Officials (IAPMO). The Sylvan Source M-600 has also been certified by the California Department of Health Services, the Massachusetts Office of Consumer Affairs, Wisconsin Department of Commerce, and Underwriters Laboratories Inc. (UL). These certifications represent critical industry validation of the M-600's quality and high performance.

About Sylvan Source

Sylvan Source delivers technically advanced ultra-clean water systems designed for residential and industrial use. Sylvan Source products produce breakthrough water quality and eliminate the use of chemicals, filters, and membranes to assure consistent water quality and delicious taste over time. Founded in 2003, the company is headquartered in Sunnyvale, California and is privately held. For more information, please visit www.sylvansource.com.
