FOR IMMEDIATE RELEASE

Sylvan Source Broadens Distribution Channel

Sylvan Source M-600 to be Marketed by Fine Appliance Distributors Across the United States

SUNNYVALE, Calif., November 29, 2005 – Sylvan Source, the provider of breakthrough ultra-clean water systems, today announced agreements with three premium appliance distributors in the Midwest, Florida, and south central United States. Oakton Distributors, Inc., ARD Distributors, Inc., and Milestone Distributors will represent the Sylvan Source M-600 System, an automatic self-contained ultra-clean water system for the home that consistently reduces more contaminants more effectively than other available technologies without the need for expensive replacement media. The new agreements significantly extend the reach of Sylvan Source and will greatly increase market exposure to the company's revolutionary technology.

“We're delighted to be represented by three of the country's leading distributors of fine appliances,” said Laura Demmons, chief executive officer. “Oakton, ARD, and Milestone Distributors will play an important role in helping us expand our visibility and reach to builders and consumers. We're confident that the partnerships will deliver significant business value for all parties and look forward to a long, profitable relationship.”

“Our dealers are responding to tremendous interest in new solutions for water purification from builders and their customers,” said Tom Boor, vice president of sales for Oakton Distributors. “The Sylvan Source M-600 System represents an exciting advance in solutions— for both its ultra-clean technology and its no-maintenance

features.” Oakton Distributors, Inc. has been serving the needs of appliance dealers, home-builders, remodelers, and the design community since 1955. Its distribution network covers Indiana, Kentucky, West Virginia, Wisconsin, Minnesota, the Upper Peninsula of Michigan, North Dakota, South Dakota and parts of Illinois, Ohio and Pennsylvania.

“As Florida experiences a growth boom, water quality has emerged as a leading issue for builders and home buyers,” said Chuck Asarnow, vice president for ARD Distributors. “We expect the Sylvan Source M-600 to become a standard component in many new-home construction projects. New home buyers increasingly view water purification as a necessity, instead of a luxury amenity.” ARD Distributors has provided award-winning service to Florida’s appliance market since 1978.

“Water quality is a top concern for almost all consumers who are building or renovating homes,” said Ramsay Woodall, vice president, of Milestone Distributors. “As a distributor of fine appliances, the Sylvan Source M-600 meets our standards for quality and reliability—and its no-maintenance feature earns it the distinction as a high-quality fixture for today’s homes.” Milestone Distributor serves Texas, Oklahoma, Louisiana, Tennessee, and Mississippi, distributing the finest home appliances and plumbing products.

About the Sylvan Source M-600

The Sylvan Source M-600 integrates degassing, distillation, and demisting technologies into a unique multi-step cleaning process. Unlike conventional filtration, reverse osmosis, and distillation systems that require regular equipment cleaning, de-scaling, or filter changes – which most homeowners find costly and inconvenient – the Sylvan Source M-600 system requires no cleaning, uses no added chemicals, filters, cartridges, or membranes. This allows Sylvan Source to provide consistently clean water over time. One M-600 unit can be used for multiple points of water delivery where demand ranges from two to six gallons per day, such as faucets, refrigerator, and icemakers.

Sylvan Source is represented in the western United States by Purcell Murray Company, a distributor of premium kitchen and bath products.

About Sylvan Source

Sylvan Source delivers technically advanced ultra-clean water systems designed for residential and industrial use. Sylvan Source products provide unparalleled water quality and eliminate the use of chemicals, filters, and membranes to assure consistent water quality and delicious taste over time. Founded in 2003, the company is headquartered in Sunnyvale, California and is privately held. For more information, please visit www.sylvansource.com.
