**FOR IMMEDIATE RELEASE**

## Leading Builders Adopt Sylvan Source Ultra-Clean Water Systems

### *M-600 Units to be Offered in New Construction*

**PCBC 2005, San Francisco, CA June 1, 2005** – Sylvan Source, the provider of breakthrough ultra-clean water systems, today announced that leading builders have adopted the Sylvan Source M-600 System as an option in new home construction projects. The Sylvan M-600, which was also announced today, is an automatic, self-contained, ultra-clean water system for the home that reduces more contaminants more effectively than other available technologies. Builders who have adopted the Sylvan Source solution include SummerHill Homes and Pacific Mountain Partners. Shapell Homes is also evaluating the potential of this new product.

Purcell Murray Company, a distributor of premium kitchen and bath products, has been named a master distributor for the new Sylvan Source M-600 product.

“Clean, safe, healthy water is becoming more and more of a concern to our homebuyers,” said Nancy Rice, director of marketing, Shapell Homes. “With Purcell Murray fully endorsing this new water system and handling the distribution, we are confident it will be well received by new home buyers.”

“SummerHill Homes is proud to be affiliated with Sylvan Source as they launch the revolutionary M-600 System,” said Lydia Lyons, vice president of marketing for SummerHill Homes. “Providing clean, healthy water right from the tap gives families peace of mind about the quality of their drinking water.”

“No other solution can do what the Sylvan Source M-600 can do,” said Frank Lang, director of purchasing, Pacific Mountain Partners. “Sylvan allows us to offer the highest-quality purification solutions available today, and we expect that clients will demand it in their new homes.”

The Sylvan Source M-600 integrates degassing, distillation, and demisting technologies into a unique multi-step, ultra-clean process. Unlike conventional filtration, reverse osmosis, and distillation systems that require regular equipment cleaning, de-scaling, or filter changes, the Sylvan Source M-600 system requires no cleaning, uses no added chemicals, and has no filters or membranes. It can be used for multiple applications where demand ranges from two to six gallons per day, such as kitchen sinks and refrigerator icemakers.

### **About Sylvan Source**

Sylvan Source delivers technically advanced ultra-clean water systems designed for residential and industrial use. Sylvan Source products produce breakthrough water quality and eliminate the use of chemicals, filters, and membranes to assure consistent water quality and taste over time. Founded in 2003, the company is headquartered in Sunnyvale, California and is privately held. For more information, please visit [www.sylvansource.com](http://www.sylvansource.com).
